

We make it easy to set zone and level controls, so the staff can stay focused on the game rather than the technology.

SOUND SYSTEM SOLUTIONS, SPORTS VENUES

SMALL SIZE SOCCER STADIUM WITH ONE STAND

Supporting you with the perfect sound

Complete System for any Venue

Whether for background or foreground music, announcements or commentary, our solutions suit every space and every budget. We offer digital and analog solutions, low-impedance and constant-voltage systems with a wide frequency range and stable coverage.

Suiting the most challenging acoustic environments

With the option to choose from a wide portfolio of front-loaded, horn-loaded and line-array loudspeakers, you can achieve sonic clarity and control in the most challenging acoustical environments.

Great sound with minimal effort

Our loudspeakers and electronics achieve the ideal balance of sophisticated performance and ease of use, including intuitive software control interfaces. We make it easy to set zone and level controls, so the staff can stay focused on the game rather than the technology.

A trusted partner

Our brands, Dynacord and Electro-Voice, have stood at the forefront of audio technology for decades, leading the way forward in terms of quality and reliability. With our experience and the best customer service in the industry, we offer true added value.

SMALL SIZE SOCCER STADIUM

SYSTEM EXAMPLE FOR A SMALL, REGIONAL STADIUM
WITH ONE STAND (TYPICAL 5,000 SEATS)

System overview

Weatherized Sx series loudspeakers, driven by C series 2-channel DSP amplifiers, provide full-range coverage for the crowd. The entire system is easily configured with SONICUE software.

System benefits

Weather-resistant Sx600PIX loudspeakers are equipped with the SAM (Strong Arm Mount) system for secure mounting and precise aiming on existing infrastructure points such as lamp poles or press boxes

The option of 100-Volt drive minimizes signal losses over long cable runs

The Sx600PIX loudspeakers are certified to Mil Spec 810 for humidity, salt spray and UV resistance, making them suitable for any outdoor environment

Dynacord C series DSP amplifiers with overload protection

ELECTRO-VOICE | LOUDSPEAKERS

Sx300PI for small stand with roof
(mounted on the roof)

Sx600PIX for other stands without roof
(mounted on lamp poles)

EVID C4.2 (back of house)

Zx1i100t (for side areas)

DYNACORD | AMPLIFIERS

C3600-FDi for Sx300PI

C3600-FDi (100V direct drive) for Sx600PIX

C3600-FDi (100V direct drive) for EVID C & Zxi100T

CMS1000

RE3-RE420

If you need it, we've got it

Deliver the ultimate audio experience for your fans regardless of the weather with the Sx family of weatherized loudspeakers. These powerful yet compact loudspeakers provide the perfect solution for the challenging conditions presented by smaller community stadia and never compromise on sound quality.

On the compact loudspeaker side we have the EVID family. This is the industry's most complete family of commercial loudspeaker solutions, with acoustically and aesthetically matched surface-mount, ceiling-mount, pendant-mount and flush-mount models for spaces of every size and shape, indoors or outdoors.

To mix it all up we have Dynacord CMS series compact mixing system consoles. The CMS series represent the preferred solution for a large number of demanding professional audio applications such as small size stadiums.
